PROFESSIONAL SUMMARY

Results-driven Python Full Stack Developer with hands-on experience in Django, Flask, React.js, and REST APIs. Transitioned from a non-IT background, completed intensive full-stack training, and built multiple full-stack web applications. Skilled in developing scalable solutions, integrating RESTful APIs, managing databases, and automating backend processes. Strong problem-solving, debugging, and collaboration abilities, ready to contribute effectively in dynamic development teams.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript
- **Frameworks:** Django, Flask, React.js, Bootstrap, Tailwind CSS
- **Databases:** SQLite, MySQL
- **Tools:** Git, GitHub, VS Code, Postman
- **Other Skills:** REST APIs, Debugging, CRUD Operations, Session Management, Dashboards, Automation, Backend Logic, API Integration, Responsive Design

PROJECTS

MindEase – Mindfulness Web App (Django, Bootstrap, JavaScript, SQLite)

<https://meditation-website-2-ku5k.onrender.com/>

- Developed a responsive web application for meditation and mindfulness exercises.
- Implemented user authentication, personalized session tracking, and progress analytics.
- Added session management to track user progress across multiple sessions.
- Integrated automated email notifications for reminders and engagement updates.
- Developed backend logic for content rendering, meditation schedules, and feedback processing.

StrideCart – E-Commerce Platform (React.js, Django REST Framework, MySQL)

<https://bikewebsite-u27x.onrender.com>

- Built a scalable e-commerce platform supporting user registration, product browsing, and cart management.
- Implemented CRUD operations for products, orders, and user accounts.
- Developed RESTful APIs and integrated backend logic for secure transactions and order processing
- Added dynamic product search, filtering, and sorting features.
- Developed dashboards for admin monitoring of users, sales, and orders.

Bake Hub – Product Showcase Site (Flask, Bootstrap, SQLite)

<https://bakery-website-rfc9.onrender.com/>

- Created a responsive web application showcasing bakery products with search and filtering capabilities.
- Implemented CRUD operations for product catalog management.
- Added session tracking for user inquiries and orders.
- Developed backend logic for dynamic content updates and seasonal promotions.
- Integrated contact form automation to streamline customer queries.

TradePro – Business Landing Page (Django, Bootstrap, JavaScript)

<https://trading-website-r4yu.onrender.com/>

- Developed a professional landing page for trading services with interactive sections and contact forms.
- Implemented backend logic for content management, testimonials, and service updates.
- Integrated email notifications for inquiries and service requests.
- Performed testing for responsiveness and reliability across devices.

Smart Desk – Stationery Inventory System (Flask, SQLite, Bootstrap)

<https://stationary-website-2.onrender.com>

- Developed a full-stack inventory management system with CRUD operations for stationery products.
- Implemented search, filter, and stock update functionalities.
- Developed dashboards for inventory tracking, sales reporting, and analytics.
- Applied secure authentication and role-based access for admin and staff.

PROFESSIONAL EXPERIENCE

Project Coordinator – CCD Technical Solutions Pvt. Ltd. (Apr 2014 – Aug 2014)

- Coordinated project documentation, vendor communication, and materials management to ensure timely project delivery.
- Assisted the project manager in process execution, scheduling, and client reporting.
- Monitored project milestones and tracked progress against deadlines, helping reduce delays.
- Liaised with cross-functional teams to streamline workflow and resolve project issues efficiently.
- Maintained accurate records of project activities and supported reporting for management review.

Business Sales Coordinator – Sujatha Biotech Pvt. Ltd. (Jun 2012 – Mar 2014)

- Facilitated day-to-day sales operations, client follow-ups, and inventory management to optimize business processes.
- Streamlined reporting procedures, improving the accuracy and efficiency of sales tracking.
- Coordinated with internal teams to ensure timely order processing and customer satisfaction.
- Assisted in preparing sales presentations, quotations, and client communications.
- Monitored stock levels and maintained proper documentation for smooth inventory operations.

EDUCATION & TRAINING

Bachelor of Engineering – Electronics & Communication Engineering – VTU, 2012

- Completed a comprehensive engineering program with in-depth knowledge in electronics, signal processing, and communication systems.
- Developed analytical and technical skills applicable to development and design.

Python Full Stack Training – VTS (Completed 2025)

- Intensive hands-on training covering Django, Flask, React.js, REST APIs, MySQL/SQLite, Git/GitHub.
- Completed multiple full-stack projects including e-commerce, inventory management, and product showcase platforms.
- Training focused on preparing for IT industry roles and building deployable web applications.
